Clicking with dollars: How consumers can pay for purchases from E-tailers Schreft, Stacey ${\tt L}$

Economic Review - Federal Reserve Bank of Kansas City v87nl PP: 37-64

First Ouarter 2002

ISSN: 0161-2387 JRNL CODE: EKC

WORD COUNT: 10164

...TEXT: of providing credit-card numbers and personal information online as the biggest barrier to cybershopping. 2 Without further improvements in consumers' online payment options, e-tailing might not realize its full...

... technology start-ups, though increasingly these tech firms are forming alliances with more established financial service providers. Regardless of their industry experience, today's payment service providers (PSPs) are generally offering new ways of using the same means of payment that... spend it immediately. As a result, a unique feature of cash is that it allows anonymous trading. No instructions are needed to direct its transfer so there is no paper trail...

... most frequently used means of payment in terms of the number of transactions made (Chart ${\bf 2}$). In 2000, U.S. consumers made 45 percent of their transactions with cash.6

Chart . . .

... has decreased. Today, consumers use paper checks in about a quarter of all transactions (Chart ${\bf 2}$).9

Debit cards. A debit card is a bank-issued plastic card that works much...

 \dots seven different applications, of which the debit-card function might be just one 10

Chart 2

There are two types of debit cards, regardless of whether the cards come with a...them exactly as they would signature-based debit cards. Behind the scenes, the issuer's **database**, not the shopper's bank account, must be accessed to verify that the the shopper...

...A record of the monetary value is either stored on the card or in a database maintained by the merchant or a third party operating the database for the merchant. Some cards are rechargeable, so consumers can add value to them; the rest are disposable with a fixed denomination . At the point of sale, consumers insert the card into an electronic device that can...

... type of stored-value card. If the record of monetary value is stored in a database maintained by the merchant or a thirdparty processor, the consumer swipes the card in the...cards are still used in the United States for only 1 percent of transactions (Chart 2).16 It was thought that when smart cards took off, stored value would too, but...of funds and goods between them, just as they would if they used an escrow service to facilitate a transaction in the physical world. The escrow service receives and verifies the transfer of funds by the buyer. It then notifies the seller...

... buyer. When the goods have been received and deemed acceptable to the buyer, the escrow service forwards payment to the seller. To use such a service , both parties to a transaction must agree in advance to use it and must register with the service . Charges for such services are about 4 percent of the transaction value. Most online escrow...

... view" credit-card sales. The merchant obtains the PSP's software and pays a competitive **fee** for set up and maintenance. Independently, consumers register with the PSP, providing their credit-card...

... online. They allow consumers to have their purchases included on their monthly bills for telephone service or Internet access. Since phone companies and Internet service providers bill customers monthly, an individual account with these service providers is essentially a charge account, but without an associated charge card. These charge accounts...

... account holder is expected to pay the bill in full each month, and a late **fee** is imposed if the bill is not paid on time. If several months pass without payment being made in full, the **service** is discontinued.

There are many advantages of this type of **payment service** and few disadvantages. It is available to almost everyone with Internet access at home since both telephone **service** and an Internet **service** provider are generally required to access the Internet. It is easy for merchants and for ...

... offer because it piggybacks on the existing systems for sending bills for phone and Internet <code>service</code> . Consumers are afforded additional privacy ... a check to pay for Internet purchases, customers simply register with the PSP offering the <code>service</code> by providing their checking-account information and email address, by choosing a user ID and...well under \$1, allowing micropayments to be made. Most providers of BMV now impose a <code>fee</code> per transaction to receivers of funds as a way of defraying the costs of processing... 1 See Forrester Research and assorted reports on Internet activity at https://cyberatlas.internet.com.

2 It is not clear whether these perceptions are accurate. Little solid data exist regarding security...

... itself. The intrinsic value of a piece of U.S. paper currency, regardless of its **denomination**, is the value of the paper and ink that constitute it and the labor and equipment usage embodied in it. In 2000, that came to 2.265 cents, according to the Department of the Treasury. Yet people are willing to exchange...

 \dots s calculations based on statistics provided in both ATM ft Debit News (November 2001, page 2) and Table 6 of Federal Reserve Financial Services (2002).

13 Merchants might like the cards...too many deposits in a month, the PSP concludes that the individual is using the **service** to operate a business and imposes additional fees, more like those charged merchants.

25 Schreft merchants. Consumers could redeem the stamps at special redemption centers for everything from waffle makers to hair dryers to outdoor play sets. Green stamps...

... frequent-flyer miles, Green Stamps never expired. In fact, there are still a couple of redemption centers in existence in the United States.
